## GREETINGS

We the Department of Clinical Microbiology and General Medicine, AIIMS Mangalagiri are happy to organize the 1st National CME on "Hepatitis – An Update" to observe World Hepatitis Day 2024 with the theme "IT'S TIME FOR ACTION".

All India Institute of Medical Sciences, Mangalagiri, an autonomous Institute of National Importance (INI) under Ministry of Health & Family Welfare, Govt. of India is established to cater quality & sustainable treatment needs of the people of Andhra Pradesh, to educate and train healthcare professionals with state of art infrastructure & to be pioneer in Biomedical Research and Innovations.

Hepatitis is an inflammation of the liver that is caused by a variety of infectious and non-infectious agents leading to a range of health problems, some of which can be fatal. Among infectious agents, hepatitis is caused by mainly 5 Hepatitis viruses referred to as types A, B, C, D and E. Toxins, alcohol & autoimmune diseases are common causes of non-viral hepatitis. The disease pattern varies based on etiology, population, severity of the illness, hence they pose challenge in early diagnosis & prevention.

Under the theme "IT'S TIME FOR ACTION", this year's World Hepatitis Day highlights the need for collaborative action to expand access to diagnosis and treatment. It is vital to bring hepatitis prevention and treatment services closer to communities to reach unreached populations and reduce illnesses and deaths.

We are conducting this CME to provide insights on the updates on challenges and current trends in infectious, autoimmune and drug induced hepatitis. Quiz competition and Poster presentation on Hepatitis is conducted to inspire & to showcase research among young healthcare professionals.

We invite healthcare professionals of various specialties across India to join us at this academic feast, interact with pioneers and connect with peers at the beautiful nature background of AIIMS Mangalagiri Campus!
